

Saving energy is the smart choice.

PSE&G helps lower energy costs for higher education.

Knowledge is power, but it takes quite a bit of energy to power a college or university. PSE&G can help your institution discover the smartest ways to save energy throughout your campus. Even the simplest improvements can lead to significant savings.

Upgrading your facilities accomplishes much more than just conserving energy. From sports facilities to classrooms, cafeterias to residence halls, the right energy efficiency upgrades can create a safer, more comfortable environment for students and staff.

Create the right environment *for learning:*

LED Lighting

- ✓ By upgrading to enhanced lighting, you create a more secure environment for entryways, parking lots, sidewalks, and other spaces throughout your campus.

Air Quality

- ✓ Upgrading HVAC equipment can help increase indoor air quality by filtering out more pollutants and allergens.

Smart Thermostats

- ✓ By creating consistent classroom conditions, you give your students fewer distractions for higher focus.

The PSE&G team is equipped to take on large-scale, complex upgrades along with smaller-scale optimizations. Plus, our interest-free on-bill repayment option and our vast network of vetted and valued Trade Allies make it even easier to save energy throughout your institution.
